Asked by : Sh. Rakesh Singha(Theog)  
Concerned Minister : MPP & Power Minister

	<b>Question</b>	<b>Reply</b>
(a)	during the last 2 years upto 01.02.2022, how many domestic animals have been electrocuted in the Theog Assembly Constituency by snapping of the electricity conductors; how many reports have been lodged with the HPSEBL and the police; has the HPSEBL made any compensation to the owner of the animals; if not, the reason for the same; and	During the last two years upto 01.02.2022, no case regarding electrocution of domestic animals has been lodged with Himachal Pradesh State Electricity Board Limited under Theog Assembly Constituency.
(b)	what is the reason for the frequent snapping of the electricity conductors; has the HPSEBL taken any steps to improve it; details be given?	Snapping of the electricity conductors is generally caused due to bad weather condition, falling of trees on conductors and excessive snow loading. For improvement, various steps are taken by

		<p>HPSEBL which include Re-conductring on spans where the existing conductor is weak/ damaged, additional poles are provided in extra long spans of lines and additional DTRs are provided under various schemes to reduce length of LT/HT line.</p>
